Graduation Project

(September - January 2026)

UX/UI DESIGNER

Schools from Overijssel

- Together with a team, we have developed an MVP for the Director of Education at Stichting Oost Onderwijs Twente en Gelderand (SOTOG).
- The MVP was built towards homeschooled children and its aim was to make their transition back to school smoother.
- As it was quite an elaborate project we have built the basis of it, later on being taken over by a company.
- I was in charge of the UX/UI of that project.
