Graduation Project (September - January 2026)

UX/UI DESIGNER

Schools from Overijssel

- Together with a team, we have developed an MVP for the Director of Education & Support Services (Directeur Dienst Onderwijs & Ondersteuning) at Stichting Speciaal Onderwijs Twente en Oost Gelderland (SOTOG).
- The MVP is built towards homeschooled children and its aim is to make their transition back to school smoother.
- As it is quite a big project we have built the basis of it and a company will take over.
- I was in charge with the UX/UI of that project.
